DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3 are allowed.
2. Claims 4-12 are canceled.
3. Claims 13-17 were previously allowed.
4. The following is an examiner's statement of reasons for allowance:

Regarding claim 1,

The prior art of record does not teach or fairly suggest a mechanism for governing channel resources in the local area network, including a transmit specification controller for granting a transmit specification to a data flow from one station on the network to another station on the network, and a TXOP mechanism for terminating transmits opportunities for stations which have successfully completed data transmission, thereby changing the length of a superframe, wherein said TXOP mechanism, during successive superframes, expands and contracts the TXOP durations of the stations in the network as a function of completed polling interval relative to the requested polling interval, and wherein the TXOP duration is T_{TXOP} , and where $T_{XTOP} = \text{Min} (\text{Max}((\text{Actual Polling Interval}/ \text{Nominal Polling Interval}) * T'_{TXOP, Avg}, T_{TXOP, Min. Data Rate}), T_{TXOP, Max Data Rate})$ where $T_{TXOP, Avg}$ corresponds to the TXOP duration required to support the mean data rate at the agreed upon transmission rate, and $T_{TXOP, Min. Data Rate}$ and $T_{TXOP, Max Data Rate}$ corresponds to the minimum data rate and maximum data rates, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
